# mophie juice pack **PRO**

## User Manual

## Made for iPhone 4S/4

### Welcome

You've just joined the elite group of individuals who demand the best. The juice pack PRO provides you with the confidence that your iPhone can lead you through the most demanding conditions. With an impact resistant design that exceeds military specifications (MIL-STD 810G), a 2500mAh capacity battery plus an included belt clip to keep it securely on your hip, you can be assured that no matter how extreme your weekend gets your iPhone will still be there when you need to get back to civilization.

### MIL-STD 810G Rated:

When we say this thing is rugged, we mean it. Exceeding MIL-STD 810G, the juice pack PRO has been tested to exceed the standards for impact protection and dust/sand penetration set forth by the United States Military. This means that it is strong enough for our fighting forces to take on the battlefield, so it should hold up to anything the average weekend warrior throws at it! While the juice pack PRO is certainly rugged and can stand up to a little rain, it is not waterproof so don't take it swimming!

### Features

With the largest battery ever built into a juice pack case, complimented by a belt clip and rugged good looks, the juice pack PRO is the perfect adventure companion.

1. 2500mAh battery to keep the adventure running longer than ever.
2. Ultra-rugged design means it's ready to go where you go – no questions asked.
3. Integrated power switch allows you to put the juice pack PRO in standby mode. Only use the battery when you need it. In standby mode (red), the juice pack PRO still allows charge and sync capabilities through the micro USB port all while providing the complete protection of a case.
4. Check the fuel tank with the 4 LED charge status indicators – always know before you go!
5. Rechargeable for over 500 cycles (Way better than average and that's full cycles, partials don't count. Go ahead, top it off.)
6. Built-in short circuit, overcharge and temperature protection. mophie's got your back.

### Compatibility

Though the juice pack PRO for iPhone 4S/4 comes with a standard iPod/iPhone connector, this battery is intended solely for use with the Apple iPhone 4S/4. Please do not attempt to use the product with any other device – things could go haywire, but contact us if they do.

### Charging your juice pack PRO

Connect the juice pack PRO to a power source using only the micro USB cable that came with your juice pack. The USB cable can be plugged in to your computer or any "Made for iPhone" wall-plug style power source with USB out including the standard iPhone USB wall adaptor. (The LEDs located on the bottom of the device will blink when charging, after 30sec the lights will turn off. Press the status indicator before you disconnect to make sure you are fully charged.)

### Important

The juice pack PRO comes charged and ready to go, but after the initial use, normal charging will take only 2.5 to 3.5 hours for maximum power – AND you can then charge it while the iPhone is inserted or separately.

### Charging your iPhone 4S/4 using the juice pack PRO

If your iPhone is drained of power or if you want to extend the battery life of your iPhone, simply snap the iPhone into the juice pack PRO. Make sure that the pin connector is securely inserted into the bottom of the iPhone and the switch is turned On (green). When the iPhone recognizes the juice pack, a battery symbol will appear on the screen and you will hear a chirp from the iPhone, this indicates that the iPhone is charging and/or using the power from the juice pack rather than from the iPhone itself.

If your iPhone is drained of power, the juice pack will first charge your iPhone. If your iPhone is fully charged, the juice pack will act as your primary battery and no power will be lost from the iPhone internal battery until the juice pack is depleted. So you keep on talkin', rockin', surf'in' and sendin'!

### Checking the status of the juice pack PRO

You are always in the KNOW! To check the battery status of the juice pack, press the button located on the bottom of the device. When pressed, the LED lights will illuminate

for several seconds. Four LEDs means that the juice pack is fully charged, and one LED means that it is almost empty.

### Switching your juice pack PRO to stand-by mode

If you'd rather use your internal battery and not the juice pack, use the switch on the lower-left corner of the juice pack, to put it into stand-by mode. The dot near the switch will indicate whether the juice pack is in stand-by mode (red) or charging mode (green). When your internal battery is low, simply flick the switch On and your iPhone will begin charging immediately.

\*Note: Using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge. We recommend waiting until your iPhone shows a low battery signal before turning on the juice pack.

### Sync with your computer without removing the juice pack PRO

While connected to the juice pack, you can still sync your iPhone with a computer. Simply connect the included micro USB cable from the juice pack PRO to the computer and sync your iPhone the same as if it was directly connected.

To keep your juice pack PRO operating to its fullest potential, make sure to do the following:

1. Keep your juice pack dry and away from moisture and corrosive materials.
2. Do not wash the juice pack with harsh chemicals, soaps or detergents. Just wipe the case with a soft, water-dampened cloth. Wipe the pins gently with a soft, dry cloth.
3. Re-charge your juice pack once every three months when not in use, and remember to charge it for one hour before putting it away the first time.

### Warranty

At mophie®, we are dedicated to making the best quality products we can. To back this up, your mophie juice pack is warranted for 1 full year from the date of purchase. Keep a copy of your purchase receipt as proof of purchase. Be sure to register your product at mophie.com to activate it and check for the latest product updates as they develop. Failure to register your product or to provide proof of purchase may void the warranty.

## Assembly instructions for the mophie juice pack PRO

---

1 Attach your phone to the battery and bottom/connector piece.

2 Connect the screen protector over front.

3 Stretch the rubber boot over the entire case.

## Dissemble and assemble

---

The first thing you need to do is separate the rubber boot from the case. The boot covers a plastic exoskeleton that the phone fits in. The rubber boot is a tight fit to ensure complete protection against dirt, sand, and splashes. The best way to open the case is to start at the bottom, between the LED status indicator and the mophie logo on the front, by lifting the small tab to begin to separate the rubber boot from the plastic.

After you remove the rubber portion of the case, you will be left with the plastic case. That separates into two pieces. The first is the screen protector and sides. The second is the battery and bottom/connector piece. The front (screen) piece clips onto the back (battery) portion. There are four attachment points, two on either side. Once you release one or more of the points, the two pieces should separate rather easily.

After the case is disassembled, the phone fits onto the 30 pin connector and rests in the case. Reattach the screen protector and the phone will be enclosed in the case. The last part is stretching the rubber boot back over the case. This might seem awkward and it will take a little getting used to. Make sure you have the rubber portion tucked in around all the bumps to ensure proper protection. Once again, this might take a little time and getting used to, to get it just right.

## FAQ

### Does the mophie juice pack PRO charge the iPhone 4S?

This mophie juice pack PRO works with any model iPhone 4S or iPhone 4.

### What are the benefits of switching the juice pack PRO to stand-by mode?

Using the stand-by switch will give you even more total battery life, as the iPhone uses additional power to be on a constant charge.

### What are the best methods for charging my juice pack PRO?

Connect the mophie juice pack to a power source using the USB cable that came with your juice pack. The USB cable can be plugged in to your computer or any "Made for iPhone" wall-plug style power source with USB out.

### Can I sync my iPhone while the juice pack PRO is still connected?

You can charge and sync your iPhone to iTunes without removing it from its juice pack via the included micro USB cable. Pretty cool huh?

### How many charge cycles do you get in the juice pack PRO?

The juice pack PRO is rechargeable for over 500 cycles (These are full cycles. Partial cycles don't count as full. So, you can charge your juice pack 10% of the way 10 times before it counts as a complete cycle.) Don't be afraid to top it off!

### Does the juice pack PRO block the speaker, microphone or cameras?

Of course not! In fact, the case incorporates enhanced audio ports that are ported and protected with a water-tight material.

### Does the juice pack PRO interfere with antenna reception?

Not a chance.

### What does the MIL-STD 810G rating mean?

The juice pack PRO has been tested to exceed the standards for impact protection and dust/sand penetration set forth by the United States Military. Being strong enough for our fighting forces on the battlefield, it should hold up to anything the average weekend warrior throws at it! While the juice pack PRO can stand up to a little rain, it is not waterproof so don't take it swimming!

## Warning

Read all instructions and warnings prior to using this product. Improper use of this product may result in product damage, excess heat, toxic fumes, fire or explosion, for which damages you ("Purchaser"), and not mStation or mophie (collectively "Manufacturer") are responsible.

⚠ Do not store battery in high temperature environment, including intense sunlight heat. Do not place battery in fire or other excessively hot environments.

⚠ Be cautious of excessive drops, bumps, abrasions or other impacts to this battery. If there is any damage to the battery such as dents, punctures, tears, deformities or corrosion, due to any cause, discontinue use and contact manufacturer or dispose of it in an appropriate manner at your local battery recycling center.

⚠ Do not disassemble this battery or attempt to repair or modify it in any manner.

⚠ Do not expose this battery to moisture or submerge it in liquid. Keep battery dry at all times.

⚠ Do not attempt to charge battery using any method, apparatus or connection other than the device's USB connector. For questions or instructions for the various ways to charge the juice pack refer to this manual's "Charging your juice pack" and "use summary" sections.

⚠ Do not attempt to replace any part of this battery.

⚠ If this battery is intended by Purchaser to be used by a minor, purchasing adult agrees to provide detailed instructions and warnings to any minor prior to use. Failure to do so is sole responsibility of purchaser, who agrees to indemnify Manufacturer for any unintended use/misuse by a minor.

⚠ All batteries have gone through a thorough quality assurance inspection. If you find that your battery is excessively hot, is emitting odor, is deformed, abraded, cut or is experiencing or demonstrating an abnormal phenomenon, immediately stop all battery use and contact Manufacturer.

⚠ For extended storage, first charge your battery for one hour.

⚠ Never dispose of batteries in the garbage. Disposal of batteries in the garbage is unlawful under state and federal environmental laws and regulations. Always take used batteries to your local battery-recycling center.

## Legal

This Battery is meant for use only in conjunction with the appropriate mobile entertainment device. Please consult your device packaging to determine whether this Battery is compatible with your particular mobile entertainment device. Manufacturer is not responsible for any damages to any mobile entertainment device incurred through the use of this product.

Manufacturer shall not in any way be liable to you or to any third party for any damages you or any third party may suffer as a result of use, intended or unintended, or misuse of this Battery in conjunction with any device or accessory other than the appropriate mobile entertainment device for which this battery is designed. Manufacturer will not be responsible for any damages you or any third party may suffer as a result of misuse of this Battery as outlined above. If you are responsible for battery use with an unintended mobile entertainment device and damages result from such use, you agree to indemnify Manufacturer for any resulting injuries to any third part(ies). mophie and juice pack are registered trademarks of mophie Inc. iPhone and iPod are trademarks of Apple Inc., registered in the U.S. and other countries.
